

Cooker Guard

Safety Device for Electric Cooker

- The Cooker Guard is a stand alone device aiming to reduce all risk of fire linked to an eventual misuse of an electric hob or cooker.
- The Cooker Guard helps elderly people to live independently and safely.
- Should the user unintentionally leave the cooker ON, the Cooker Guard will automatically turn the cooker off before the temperature gets to high or when the preset time has elapsed.

Cooker Guard

Safety Device for Electric Cooker

Description

The Cooker Guard monitors temperature and time. The Cooker Guard turns automatically the cooker off if the temperature is too high or when the preset time has run out. The Cooker Guard does not reset unless someone comes and turns off the Cooker.

The Cooker Guard monitors only the temperature coming out of the hot plates. However the time applies to both the hot plates and the oven. The Cooker Guard allows a cooking time between 10 minutes and 2 hours depending on how it has been set.

The Cooker Guard sounds a local alarm when the temperature is too high or when the time is up. The colour of the

LED light on the heat sensor also indicates the cooker's temperature level.

For safety reasons, if the cooker turns off due to high temperature, the Cooker Guard cannot be reset before the cooling down period has expired. The cooling down period is the time that the cooker needs to go back to a lowest temperature required for a safety use. This time varies between 2 and 18 minutes depending on the cooker. The cooling down period is set dynamically in a self-learning process of the Cooker guard.

The Cooker Guard is primarily used in a domiciliary care or in a care home or hospital environment.

Specifications:

Product Code	F1671	
	Control Unit:	Sensor Unit:
Colour	White (red)	White
Weight	2060g	190g
Dimensions	335 × 104 × 53 mm	121 × 83 × 22 mm
Material	Metal	Plastic
Installation	Terminal Block	240 cm cable with a RJ45 plug
Max. current	45A	
Voltage	230V	
Phase	1N	
Frequency	50Hz	
Directives	CE marked	

da_F1671_UK_v01
