

SSD-PM2

Heavy Duty Pressure Mat

Positioned alongside a bed or beside a doorway, our heavy duty floor sensor mat ensures that staff are aware when a client attempts to gain access to a restricted location or has simply left their bed and is at risk of falling.

Receive notification when a client begins to wander with our heavy duty floor sensor mat.

The tri-fold mat is specially designed to allow it to be folded down for easy shipping and storage. The extra large size of 1200mm x 600mm means a greater floor area is covered and helps to reduce the chances the client can step over it or otherwise avoid making contact.

- Natural non-slip properties
- Extra large size
- Can be folded into 3 for easy storage
- Manufactured from tough, durable PVC
- Water resistant and may be wiped clean
- Suitable for placing onto a wide variety of surfaces
- Compatible with multiple nurse call systems

The SSD-PM2 features an extra large surface area meaning more of the floor is covered

When not in use, the SSD-PM2 can be safely folded to just a third of its original size, perfect for storing
