

Intercall

7000

in touch  
with care

**INTERCALL**<sup>®</sup>  
NURSECALL SYSTEMS

The logo features the word 'Intercall' in a white sans-serif font on a white rectangular background. To its right, the number '700' is rendered in a very large, white, rounded sans-serif font. The background is a gradient of purple and blue, with a yellow square in the upper right and a dark blue square in the lower right.

Intercall

making life  
simpler for the  
nurse – and  
safer for the  
resident

Safety and security are the most important requirements of every modern nursing home or hospital. Patients and residents need as much freedom and independence as possible; and care managers need the reassurance that they can respond to any event quickly, efficiently and effectively.

**The most advanced system on the market**

The Intercall 700 system builds on over 20 years of specialisation in nurse call systems to give you one of the most flexible and comprehensive care management systems in the world. It offers a wide range of easy-to-use triggering devices for the patient or resident. It offers complete event recording facilities for the care manager or estate manager. In addition, the 700 System can normally be installed directly into an existing wiring system, keeping disruption to an absolute minimum.

**The simplest system on the market**

The 700 System audio call points feature hands-free two-way speech with an audio page facility, configurable emergency 'crash call' button and ten levels of call including 'priority' and 'attack'.

# flexibility

that's tailored to your needs

## the Intercall system gives you all the options

**The Intercall 700 system gives you all the options to configure a system to your exact needs:**

- Designed to grow as your needs do – enables you to provide the highest standards of care, both now and in the future.
- Full event details for the carer – all event data can be downloaded into a pc for future reference and reports.
- Hands-free two-way audio communication – enables you to reassure the patient while help is on its way.
- Multi-level alarms - enabling you to prioritise every call instantly.
- Page facility transmits from all call points – enables all staff to be contacted simultaneously.
- All call units are software controlled – so you can reconfigure resident and room descriptions at any time.
- Printers and alphanumeric pagers can be connected – for permanent printed records and staff can be kept up to date with any event, wherever they are.
- Infra red trigger option – allows calls to be made from anywhere the resident goes
- Wide range of accessories – including breath switches, pressure mats, water-resistant air switches and pear leads.
- Trouble-free installation – every Intercall 700 unit has been designed for fast, simple installation.
- Ongoing support – your Intercall 700 system will be installed by highly trained engineers, and of course we provide long-term back up throughout the life of your system.

“ Intercall 700 is the most comprehensive nurse call system we have ever developed. It is based on over 20 years experience from the UK’s only specialist manufacture of nursing home and hospital call systems ”

## quality that’s built in – not bolted on

### Giving you all the options:

**audio call point** – features seven levels of priority calls, hands-free two-way intercom, integral infra red receiver, audio page facilities and call-follower sounder.

**standard call point** – for use where intercom facility is not required. Features integral infra-red receiver and call follower sounder.

**audio display unit** – provides call information with built-in sounder, call accept, staff location and intercom facilities.

**call/display unit** – combines the features of the speech call point with a built-in display, enabling staff to talk to other callers elsewhere on the system.

**door monitoring point** – protects fire doors, entrance and exit doors and other sensitive areas. 20-second exit timer with audible bleep to prevent sensitive doors being left open.

**portable infra red receiver** – to enable residents to call from anywhere in the room without the need for trailing leads.

**overdoor light** – for outside room or end of corridor indication as “follow me” lights. Also available with integral sounder.

**call management software** – records all system activity allowing management analysis of patient care and staff performance.

# Intercall 700

security and peace of mind  
for care homes and hospitals

“ because of the system’s inherent flexibility,  
you can easily add extra call points, display  
units and a wide range of additional  
features as and when you need them ”

The requirements placed on care environments seem to increase relentlessly. Whatever their disability, the elderly or infirm need easy-to-use and understand alarm activators. At the same time, the busy care manager or estate manager needs reliable and up to date information on every incident.

The Intercall 700 system is designed to provide maximum freedom and ease of use for the elderly or unwell, plus a simple and reliable information system that gives complete control over the entire premises – and a full audit trail of every event.

#### **Complete flexibility to adapt to changing requirements**

The Intercall 700 system has been designed to offer total flexibility of configuration, making it the ideal solution whatever the individual requirements of the home or hospital. Furthermore, because of the system’s inherent flexibility, you can easily add extra call points, display units and a wide range of additional features as and when you need them.

It provides hands-free two-way speech facilities between all audio units, with ten levels of call priority, and the CMS Lite Call Management software enables you to store all Intercall activities on a standard personal computer.

With its unique combination of flexibility, simplicity and efficiency, Intercall 700 is the undisputed market leader in nurse call systems.

# system 700

## Intercall The UK's best selling nursecall system

For over 20 years, Intercall systems have been providing professional solutions to help nursing homes and hospitals manage patient care on a 24-hour day-to-day basis.

Every Intercall system and product is the result of our in-depth association with literally thousands of locations – learning first-hand what care managers and estate managers expect from nursecall systems.

It is that in-depth experience and co-operation that has made Intercall the leading name when it comes to providing security.
